# INDEX

**Agui, J. H.** *See* Andreopoulos & Agui

**Andreopoulos, J. & Agui, J. H.** Wall-vorticity flux dynamics in a two-dimensional turbulent boundary layer 45–84

**Apazidis, N. & Lesser, M. B.** On generation and convergence of polygonal-shaped shock waves, 301–319

**Brasseur, J. G.** *See* Wang, Chen, Brasseur & Wyngaard

**Chen, S.** *See* Wang, Chen, Brasseur & Wyngaard

**Cunha, F. R. de & Hinch, E. J.** Shear-induced dispersion in a dilute suspension of rough spheres, 211–223

**Ding, Z. & Gracewski, S. M.** The behaviour of a gas cavity impacted by a weak or strong shock wave, 183–209

**Gracewski, S. M.** *See* Ding & Gracewski

**Hinch, E. J.** *See* Cunha & Hinch

**Holloway, G.** *See* Merryfield & Holloway

**Hussain, F.** *See* Shtern & Hussain

**Lesser, M. B.** *See* Apazidis & Lesser

**Linden, P. F.** *See* Thomas & Linden

**Merryfield, W. J. & Holloway, G.** Inviscid quasi-geostrophic flow over topography: testing statistical mechanical theory, 85–91

**Nickels, T. B. & Perry, A. E.** An experimental and theoretical study of the turbulent coflowing jet, 157–182

**Perry, A. E.** *See* Nickels & Perry

**Raman, G. & Taghavi, R.** Resonant interaction of a linear array of supersonic rectangular jets: an experimental study, 93–111

**Schulkes, R. M. S. M.** The contraction of liquid filaments, 277–300

**Shtern, V. & Hussain, F.** Hysteresis in swirling jets, 1–44

**Stewart, D. S.** *See* Yao & Stewart

**Taghavi, R.** *See* Raman & Taghavi

**Thomas, P. J. & Linden, P. F.** A laboratory simulation of mixing across tidal fronts, 321–344

**Wang, L.-P., Chen, S., Brasseur, J. G. & Wyngaard, J. C.** Examination of hypotheses in the Kolmogorov refined turbulence theory through high-resolution simulations. Part 1. Velocity field, 113–156

**Wyngaard, J. C.** *See* Wang, Chen, Brasseur & Wyngaard

**Yao, J. & Stewart, D. S.** On the dynamics of multi-dimensional detonation, 225–275
